

Join HP, VMware, Intel and Vital Support Systems for a Realize Business Continuity through Virtualization Workshop

The Three Critical Components of a Successful Business Continuity Strategy

Attend a workshop where you will learn how HP, VMware® and Intel® can protect your business-critical IT infrastructure by laying the foundation for a successful business continuity strategy. In this workshop, you will see how HP StorageWorks P4000 SAN solutions powered by Intel® Xeon® processors and VMware® virtualization technology can increase availability and reduce overall costs, while improving your infrastructure's performance.

HP has teamed up with Vital Support Systems to help you realize business continuity through virtualization. During these informative workshops, you will:

- * Discover the three critical components of a successful business continuity plan with virtualization as the foundation.
- * Benefit from data center virtualization with VMware vSphere & trade' 4.1.
- * See how a combined HP, VMware, and Intel® high-availability, disaster-recovery, and data-protection solution can overcome system failures that threaten to interrupt business operations.
- * Assess your business continuity strategy with best-practice checklists.
